

GeoPal

Your personal,
location-based reminder

Forgetful people forget.
“GeoPal helps them *unforget* stuff, by reminding them of sth. up on reaching a set location!”

People with *dementia** exist

GeoPal helps these people, by providing an application, which helps them remember stuff, up on reaching a defined predefined location!

*Speaking from experience. This app will help me very much

What is *in* the app?

- GP reads your GPS data!
- GP has multiple views, which communicate!
- GP persists your data *locally*!
- GP runs in the background!
- GP has built-in animations!
- GP has its very own icon!
